VORTICE AIR SOLUTIONS

HOW TO IMPROVE THE AIR QUALITY WITH VORTICE?

The quality of indoor air has never been as crucial for a healthy life and for the people's well-being as it is today. Air quality technologies represent essential solutions to reduce the risk of the spread of pathogens such as viruses, bacteria and moulds, but also dust, mites, seasonal pollen and fine dust.

In order to improve the air quality, it is fundamental to focus on air exchange, purification and sanitisation. Combining these three processes, it is possible to act on the pathogens, so to neutralise them and consequently to ensure the health and safety of the people in the rooms.

A suitable air exchange allows to dilute the pollutant in the air we breathe. Purification allows to filter and purify the air introduced by the air exchange. Finally, sanitisation allows to sterilise all surfaces and objects, for people's safety.

APPLICATIONS

Offices, meeting rooms and professional studios

Restaurants, bars and canteens

Waiting rooms and common rooms

Universities, schools and kindergartens

Gyms and changing rooms

Beauty centres

AIR EXCHANGE

AXIAL FANS FOR
WALL/GLASS INSTALLATION

VORTICE VARIO Range

VORTICE VARIO Range is composed of fan extractors able to exchange the air. They introduce clean air from the outside into the premises and extract the polluted air, ensuring our safety and health.

DECENTRALISED HEAT
RECOVERY UNITS

VORT HRW MONO Range

VORT HRW MONO Range is composed of ventilation units able to exchange the air. They introduce filtered ambient air in the rooms and extract the polluted indoor air to the outside while recovering energy (heat during winter and cold during summer).

PURIFICATION

PURIFIERS + IONISERS

VORTRONIC Range

VORTRONIC Range is composed of air purifiers + ionisers suitable for environments up to 200 m³. They are able to eliminate up to 98% of the pathogens in the air, such as pollen and microparticles, which are potential carriers of viruses and bacteria.

AIR PURIFIERS WITH HEPA H14 FILTERS
AND PHOTOCATALYSIS MODULE

DEPURO PRO Range

DEPURO PRO Range is composed of air purifiers suitable for environments up to 100 m². The filters are able to retain up to 99.995% of polluting microparticles, which are potential carriers of viruses and bacteria. Moreover, they are equipped with a photocatalysis module able to eliminate 99% of the above-mentioned pathogens, clean the filters and sanitise the air.

SANITISATION

SOAP AND GEL DISPENSERS

SOAP AND GEL DISPENSER Range

Soap and gel dispensers are automatic electric dispensers of soap or disinfectant gel. The right amount of soap or gel - without touching anything.

AUTOMATIC HAND DRYERS

VORT SUPER DRY Range

VORT SUPER DRY Range is composed of automatic electric hand dryers with UV germicidal lamp. They dry and sanitise the hands without the need to touch anything. Maximum hygiene and safety for the user.

GERMICIDAL UV-C LAMP

UVLOGIKA SYSTEM Range

UVLOGIKA SYSTEM is a germicidal UV-C lamp, ideal for sanitising and disinfecting surfaces. Its radiation quickly eliminates up to 99% of bacteria, viruses and other pathogens that are deposited on surfaces.
